MS SQL Server 2017, Entity Framework

Architectural Patterns
MVC, MVVM (via Razor Pages)

Development IDE's
Visual Studio, Visual Studio Code

Tools & Platforms
Git, nUnit, xUnit, Selenium, Netlify

Projects

Game Store
Web application built using ASP.NET Core and Razor Pages. It uses Entity Framework with MS SQL Server for the database. This project is a game store that allows accounts to be registered, games to be "purchased" and more.

Personal Website
This website is used to display my skills and to present a portfolio of projects. It was also used to teach myself React.

Live Polling Application
A live polling application built using ASP.Net Core for the backend and React for the frontend. This was made for our Capstone project and elements of it could be used for the Openkata project.

Education

Conestoga College
2017 - 2020
Three-year advanced diploma in the Computer Programmer/Analyst program
